'M' Press

Combines discs, tines and press rings to provide a single machine, equally at home as a primary cultivator in a minimum tillage solution or a secondary cultivator in a plough based system.

#### Key Features

- 3m, 4m & 5m working widths.
- 25hp - 35hp per metre power requirement.
- Hydraulic Folding.
- Semi mounted.

#### Popular Options

- Spring or rigid 'Speed-Loc' tines.
- Rubber cushioned discs.
- Dutch tine levelling system.

#### 'Revolver' Press Ring Technology

- 600mm diameter rings.
- Sharp point for clod splitting.
- Broad shoulder for depth stability.
- Produces a firm, weatherproof seed bed.

Knight

'C' Press

A heavy duty primary cultivator combining discs and tines to give good trash control and soil loosening without forming a pan.

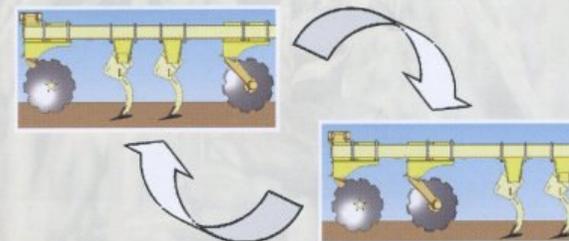

'Revolver' press rings complete the combination by creating a firm and level weatherproof finish ready for the seed drill.

#### Key Features

- 3m fixed or 4m, 5m, 6m & 7m hydraulic folding working widths.
- 50hp - 70hp per metre power requirement.
- Linkage head stock or Conventional drawbar.
- Adjustable tine and tine bar spacing.
- Shallow or Deep working 'Speed-Loc' tines to 300mm.
- 700mm diameter 'Revolver' Press Rings.

#### One Machine - Multiple Configurations

- The 'C' press combination of discs and tines is easily adapted to suit seasonal variations.

Knight

A heavy duty press cultivator designed for primary or secondary cultivation with two rows of tines or discs followed by the Dutch Tine levelling system and a double row of 700mm diameter 'Revolver' press rings.

#### Key Features

- Two rows of 'Speed-Loc' tines.
- Dutch tine levelling system.
- Front roller for depth stability and trash control.
- Optional individual rubber mounted discs.
- Double row of 700mm shouldered press rings.

#### Unique Features

- Dutch tine levelling system.
- Front depth control roller.

#### 'Speed-Loc' quick change system

- Quickly changed to suit different soil conditions.
- Wide range of point options.
- Simple 'knock on' system.
- Change a full set of points in 10 minutes!

#### 'M' Press Drill

The combination of Knight 'M' Press and Rabe Megaseed produces a versatile single pass till and drill solution.

#### Key Features

- Use the M Press as a cultivator.
- Couple to other implements with the rear three-point linkage.
- Combine with the Rabe MegaSeed for min-till and drill.
- Produces a firm level seedbed in one pass on ploughing.
- Mid wheel layout turns easily on headlands.

- Mid wheel layout enables tight headland turns to be easily completed.
